

Report No. 524(62/2.2/1)

**Operational Characteristics of Unorganised
Manufacturing Enterprises In India**

**NSS 62nd Round
(July 2005-June 2006)**

सत्यमेव जयते

**National Sample Survey Organisation
Ministry of Statistics and Programme Implementation
Government of India
December 2007**

PREFACE

National Sample Survey Organisation (NSSO) conducted an integrated survey of households and unorganised manufacturing enterprises in the 62nd round of NSS during July 2005 - June 2006. The subjects covered were household consumer expenditure, employment and unemployment and unorganised manufacturing enterprises. The present report is the first one in a series of three reports to be brought out based on the survey on unorganised manufacturing enterprises. Apart from information on estimated number of enterprises and number of workers, the report provides the information on operational characteristics of the enterprises like location of enterprise, maintenance of accounts, number of working hours, nature of operation etc. at all India level for different industry groups and at the level of states / UTs for all the industry groups taken together.

Chapter One of the report is introductory. Chapter Two deals with concepts and definitions. Chapter Three of the report gives the summary of the findings. Detailed tables based on the survey are given in Appendix A. The sample design and estimation procedure are given in Appendix B. Facsimile of schedule canvassed during the survey is given in Appendix C.

Survey Design and Research Division of NSSO developed the sample design and survey instruments and also prepared the report. The Field Operations Division of NSSO carried out the fieldwork and the Data Processing Division of NSSO handled the data processing and tabulation work. The Coordination and Publication Division of NSSO coordinated various activities pertaining to the survey.

I am grateful to the Chairman and Members of the then Governing Council of NSSO and also the Chairman and Members of the Steering Committee and Working Group for the NSS 62nd round for their technical guidance at various stages of survey work. I convey my special thanks to Chairman and members of the National Statistical Commission and also to the Editor of the report for their valuable advice in finalizing the report. I am grateful to all Officers and Staff Members of this Ministry who were associated with the survey for their contribution. Special thanks are also due to the informants who provided the requisite information during the data collection in the survey.

The report, I hope, will be useful to planners, policy makers and researchers. Comments and suggestions for improvement will be most welcome.

1	Number of first stage units allotted and surveyed by State/UT	A - 1
2	Number of enterprises surveyed by industry code for each State/UT	A-2 – A-37
3	Number of enterprises by industry code for each State/UT	A-38 – A-73
4	Per 1000 distribution of enterprises by nature of operation for each industry and for each State/UT	A-74 – A-89
5	Per 1000 distribution of enterprises by type of ownership for each industry and for each State/UT	A-90 – A-113
6	Number of workers by enterprise type for each industry and for each State/UT	A-114 – A-128
7	Per 1000 distribution of enterprises by type of location for each industry and for each State/UT	A-129 – A-152
8	Per 1000 distribution of workers by number of working hours in a normal day of the enterprise during the reference year for each industry and for each State/UT	A-153 – A-159
9	Per 1000 distribution of workers by number of working hours in a normal day of the enterprise during the reference month for each industry and for each State/UT	A-160 – A-166
10	Per 1000 distribution of workers by type of ownership for each industry and for each State/UT	A-167 – A-190

Table no.	Table description	Page
11	Per 1000 distribution of enterprises by general education level of working owner of the enterprise for each industry (only for proprietary and partnership enterprises) and for each State/UT	A-191 – A-214
12	Per 1000 distribution of enterprises by maintenance of accounts for each industry and for each State/UT	A-215 – A-229
13	Number per 1000 of enterprises by act/authority of registration for each industry and for each State/UT	A-230 – A-265
14	Number Per 1000 of enterprises by nature of problems faced for each industry and for each State/UT	A-266 – A-280
15	Per 1000 distribution of enterprises by type of contract for each industry and for each State/UT	A-281 – A-295
16	Number per 1000 of enterprises by type of assistance received for each industry and for each State/UT	A-296 – A-310
17	Per 1000 distribution of enterprises pursuing mixed activity by enterprise type for each industry and for each State/UT	A-311 – A-316
18	Per 1000 distribution of enterprises by growth status (over a period of last 3 years) for each industry and for each State/UT	A-317 – A-331
19	Per 1000 distribution of enterprises by number of months operated during last 365 days for each industry and for each State/UT	A-332 – A-346
20	Per 1000 distribution of enterprises working on contract (i) by source of equipment, (ii) by supply of raw materials and (iii) specification of design for each industry and for each State/UT	A-347 – A-364
21	Per 1000 distribution of enterprises by other economic activities and major source of annual income of owner of the enterprise for each industry (for proprietary and partnership enterprises only) and for each State/UT	A-365 – A-379
22	Per 1000 distribution of workers by other economic activities and major source of annual income of owner of the enterprise for each industry (for proprietary and partnership enterprises only) and for each State/UT	A-380 – A-394
23	Per 1000 distribution of owners of enterprises undertaking other economic activities during reference year by type of other economic activities for each industry and for each State/UT	A-395 - A-409

भारत में असंगठित विनिर्माण उद्यमों की प्रचालनात्मक विशेषतायें (जुलाई 2005 - जून 2006)

मुख्य परिणाम

(यह सर्वेक्षण 4798 ग्रामों और 5125 नगरीय खंडों में किया गया था। कुल मिलाकर 82897 उद्यमों (नगरीय क्षेत्रों में अवस्थित 2260 सूची ढांचा उद्यमों सहित) का सर्वेक्षण किया गया।)

- भारत में 2005-06 के दौरान कुल मिलाकर 17070820 असंगठित विनिर्माण उद्यम आकलित किये गये।
- आकलित कुल उद्यमों में से, 71% ग्रामीण भारत में और 29% नगरीय भारत में थे।
- कुल उद्यमों में से 86% स्व-कार्यरत विनिर्माण उद्यम (OAMEs) और शेष 14% अधिष्ठान थे।
- 2005-06 के दौरान असंगठित विनिर्माण उद्यमों में कुल 36442799 व्यक्ति के कार्यरत होने का आकलन किया गया।
- प्रति उद्यम कामगारों की संख्या लगभग 2.13 थी।
- सभी उद्यमों में से लगभग 98% स्वामित्व वाले उद्यम थे।
- सभी उद्यमों में से लगभग 90% उद्यम किसी भी एजेंसी के अधीन पंजीकृत नहीं थे।
- सभी उद्यमों में से लगभग 3% के प्रचालन का कोई नियत परिसर नहीं था।
- सभी उद्यमों में से लगभग 94% बारहमासी उद्यम थे।
- सभी उद्यमों में से लगभग 81% ने संदर्भ वर्ष के दौरान 9 महीने से अधिक प्रचालन किया।
- सभी उद्यमों में से लगभग 92% ने किसी भी सरकारी या गैर-सरकारी एजेंसी से कोई सहायता प्राप्त नहीं की।
- सभी उद्यमों में से लगभग 32% ने अनुबंध आधार पर कम से कम कुछ कार्य हाथ में लिया था।
- सभी उद्यमों में से लगभग 28% ने अन्य आर्थिक कार्यकलाप किया था।
- आय के मुख्य स्रोत के रूप में अन्य आर्थिक कार्यकलाप करने वाले उद्यमों में से अधिकांश (77%) ने कृषि, शिकार, वानिकी, खनन, उत्खनन आदि (राऔव 2004 के अनुभाग A से C) से आय प्राप्त की थी।
- सभी उद्यमों में से लगभग 3% उद्यम 2005-06 के दौरान मिश्रित कार्यकलाप कर रहे थे।

**Operational Characteristics of Unorganised Manufacturing Enterprises in India
(July 2005-June 2006)
Highlights**

(The survey was conducted in 4798 villages and 5125 urban blocks. A total of 82897 enterprises (including 2260 list frame enterprises located in urban areas) were ultimately surveyed.)

- A total of 17070820 unorganised manufacturing enterprises were estimated in India during 2005-06.
- Of the total enterprises estimated, 71% were in rural India and 29% in urban India.
- OAMEs constituted 86% of all enterprises and the remaining 14% were establishments.
- A total of 36442799 persons were estimated to be working in unorganised manufacturing enterprises during 2005-06.
- The number of workers per enterprise was about 2.13.
- About 98 % of all enterprises were proprietary enterprises.
- About 90 % of all enterprises were not registered with any agency.
- About 3 % of all enterprises had no fixed premises of operation.
- About 94 % of all enterprises were perennial enterprises.
- About 81 % of all enterprises operated more than 9 months during the reference year.
- About 92 % of all enterprises did not receive any assistance from any government or non-government agency.
- About 32 % of all enterprises had undertaken at least some work on contract basis.
- About 28 % of all enterprises had undertaken other economic activity.
- Majority (77%) of enterprises having other economic activities as the major source of income derived income from agriculture, hunting, forestry, mining, quarrying etc (sec. A to C of NIC 2004).
- About 3 % of all enterprises were pursuing mixed activity during 2005-06.

Chapter One

Introduction

1.1 Brief history

1.1.1 An all-India survey on unorganised manufacturing enterprises was carried out by the National Sample Survey Organisation (NSSO) as a part of the 62nd round of National Sample Survey (NSS) during July 2005 – June 2006. The other subjects of enquiry, which formed part of this round, were annual surveys on household consumer expenditure and employment-unemployment.

1.1.2 Manufacturing sector is one of the important sectors in the Indian economy. As per the latest available National Accounts Statistics¹, during 2006-07, the manufacturing sector had a share of about 16% in the GDP at factor cost. For the purpose of data collection, manufacturing sector has been broadly sub-divided into two categories organised (covering units coming under Factories Act, 1948) and unorganised manufacturing. While data for organised manufacturing sector are collected through Annual Survey of Industries (ASI), the same for the residual non-factory unorganised manufacturing sector are collected periodically through NSS as follow-up surveys of Economic Censuses (EC). The unorganised manufacturing sector has roughly about one-third share in the total contribution by the manufacturing sector in the GDP.

1.1.3 Recognizing the importance of the unorganised manufacturing sector in terms of its share in GDP as well as in total employment, NSS has taken up this subject in many of its rounds. The collection of data on unorganised manufacture has a long history in the NSS. In fact, the very first round of NSS had small-scale manufacture and handicrafts as one of its subjects of enquiry. Thereafter, data on small-scale manufacture were collected also in the NSS rounds 3-10, 14, 23 and 29. These surveys used the list of villages as per the Population Census and list of census enumeration blocks, or lists of Urban Frame Survey (UFS) blocks as per the NSSO subject to their availability, as the sampling frame for selection of villages / urban blocks.

1.1.4 A review of the surveys conducted by NSSO in the initial rounds mentioned above indicated that a better sampling frame was necessary to generate more useful statistics on the unorganised sector. The need for basic information on geographical areas of concentration of enterprises for stratification purpose was strongly felt with a view to developing more efficient sampling designs. This demand ultimately culminated in the conduct of periodic Economic Censuses (EC), which provided the frame for the follow-up surveys on non-agricultural enterprises including those engaged in unorganised manufacture.

1.1.5 With the launching of the EC in 1977 (*five ECs have been conducted so far*), the follow-up surveys of EC on unorganised manufacture generally used the village and block level information on number of enterprises/workers as per the EC for selection of

¹ Press Note, 31st May 2007, Central Statistical Organisation
NSS Report No 524: Operational Characteristics of Unorganised Manufacturing Enterprises in India, 2005-06

villages and urban blocks in the follow-up surveys. The approach of data collection from enterprises was also changed from the 'household approach' that used to be adopted earlier (i.e. prior to the launching of EC) to the 'site approach' whenever such sites existed. So far NSS has conducted six follow-up surveys of EC through rounds 33rd (1978-79), 40th (1984-85), 45th (1989-90), 51st (1994-95), 56th (2000-01), and 62nd (2005-06) with unorganised manufacture as the main subject of enquiry. In the 62nd round of NSS, area frame thrown up by the latest EC (1998) was however used only partially because the frame was considered to be old. However, for 27 cities having a population of one million or more (as per Census 2001) which are likely to have a substantial share in the total number of unorganised manufacturing enterprises in the country, a conscious decision was taken to make use of the list of urban blocks giving count of number of enterprises/workers at the block level as per EC 1998 as the sampling frame for stratification and selection of urban blocks. For the remaining towns/cities, latest lists of UFS blocks were used as the sampling frame². In case of rural areas, list of villages (or *panchayat wards* in case of Kerala) as per Census 2001 served as the sampling frame for selection of villages as the first-stage units (FSUs).

1.2 Scope of the survey and sample design in brief

1.2.1 The term 'unorganised manufacture' under the coverage of 62nd round basically referred to all manufacturing enterprises, which were not covered by ASI. All government and public sector undertakings were also outside the coverage of the survey. In terms of National Industrial Classification (NIC) 2004 codes, the 62nd round survey on unorganised manufacture covered the NIC 2-digit codes 15-37. In addition, enterprises engaged in cotton ginning, cleaning and baling (NIC 2004 code 01405) were also covered under the survey (*see Table 0 at the end of this chapter for the NIC codes under coverage along with their descriptions*). It is to be noted that only those manufacturing enterprises, which operated for at least 30 days (15 days for seasonal enterprises) during the last 365 days preceding the date of survey, were eligible for survey.

1.2.2 The survey covered the whole of the Indian Union except (i) Leh and Kargil districts of Jammu & Kashmir, (ii) interior village of Nagaland situated beyond five kilometres of bus route and (iii) villages of Andaman and Nicobar Islands which remain inaccessible throughout the year. All the sample FSUs of the districts Poonch and Rajouri of the state of Jammu and Kashmir became casualty. Thus, the estimates for Jammu and Kashmir as well as for all-India do not include these areas.

1.2.3 As stated earlier, the fieldwork for the 62nd round was carried out during July 2005 to June 2006. The entire survey period was divided into four sub-rounds of three months each. In each of these sub-rounds, equal number of sample villages/urban blocks was allotted for survey with a view to ensuring uniform spread of fieldwork over the entire survey period. All efforts were made to complete the fieldwork in a sample village/block during the sub-round period to which it was allotted.

² It is to be noted that UFS blocks do not provide information on number of enterprises/workers at the UFS block level. But information on whether any UFS block of the town/city is located in 'industrial area', 'bazar/business area', etc. is available. This information was utilized for stratification/selection of sample UFS blocks (see Appendix B for details).

1.2.4 One salient feature of the sample design adopted during the 62nd round was the use of list frame in order to capture sufficient number of relatively ‘bigger’ manufacturing units under the coverage of the survey. It is quite natural that even within the unorganised manufacturing sector, there are likely to be some very ‘big’ non-ASI manufacturing units whose contribution to total gross value added is likely to be substantial. Thus, with a view to improving the overall estimate of gross value added per worker, total number of workers, total input, total output, etc., a dual frame approach was considered appropriate for sampling purposes in NSS 62nd round. A list of 8,000 big non-ASI manufacturing enterprises³ for the urban sector only was prepared as per the data of the census of manufacturing enterprises conducted by Development Commissioner of Small Scale Industries (DCSSI) in 2003. This list served as the list frame. All these units in the list frame were considered for survey without resorting to any sampling. For the coverage of all other unorganised manufacturing enterprises in the universe (i.e. other than 8,000 enterprises featuring in the list frame), an area frame approach was followed for sampling of unorganised manufacturing units in stages. It is worthwhile to mention that this dual frame approach was experimented for the first time in the 62nd round.

1.2.5 In the area frame approach, the list of all the villages (*panchayat wards* in case of Kerala) / urban blocks of the country served as the sampling frame of FSUs (also see paragraph 1.1.5). The first stage units (FSUs) were villages (*panchayat wards* in case of Kerala) in the rural sector and urban blocks in the urban sector. The ultimate stage units were unorganised manufacture enterprises in both the sectors. However, in case of large FSUs requiring hamlet-group (hg) / sub-block (sb) formation, one intermediate stage in the sampling involved the selection of two hg’s / sb’s from each FSU out of a minimum of three hg’s/sb’s formed in the FSU. Of these two selected hg’s/sb’s, one was selected with probability ‘1’ (termed as segment 1) and another one (termed as segment 2) was selected from among the remaining hg’s/sb’s of the FSU at random. The hg/sb selected with certainty (i.e. segment 1) was the hg/sb having maximum number of directory manufacturing establishments (DMEs) (*or with maximum number of non-directory manufacturing establishments (NDMEs) if there was no DME, or with maximum number of own account manufacturing enterprises (OAMEs) if there was no DME/NDME, or with maximum population if there was no DME/NDME/OAME⁴ in the entire FSU*). Smaller FSUs without any hg/sb formation were identified/categorized as segment 1 for the purpose of survey (segment 2 does not exist for such FSUs). As regards the first stage stratification, two basic strata were formed within each district of a State/UT: rural stratum comprising all rural areas of the district and urban stratum consisting of all urban areas of the district. However, each city with a population of one million or more as per Census 2001 was invariably treated as a separate stratum by itself. For details of stratification, sub-stratification and selection of sample FSUs, reference may be made to Appendix-B of this Report.

1.2.6 For each of segments 1 and 2 for the selected sample FSUs, a frame of eligible unorganised manufacturing enterprises was prepared by the field investigators by visiting each and every house/household within the selected geographical area. While doing so, if

³ For definition of such ‘big’ enterprises, refer to Appendix-B of this report.

⁴ see Chapter Two for definitions of DME, NDME and OAME.

any enterprise of the list frame was encountered, care was taken not to list it again within segment 1 or 2 as a part of the area sample / area frame to guard against duplication of enterprises between the two types of frames. Listing and sampling of enterprises in the area frame was independent for each of segments 1 and 2. In this context, it may be mentioned that for each selected FSU of rural *sub-strata* 1 and 2 only⁵ (see Appendix B for composition of these two sub-strata), segment 9 was also carved out within the FSU, which comprised top 10 (in terms of number of workers) big non-ASI registered SSI manufacturing units⁶ located within the boundaries of the entire FSU (see para 1.4.1). The list of such units for selected FSUs was made available to the field investigators in order to facilitate formation of segment 9. Respective frames of segments 1 and 2 in these FSUs excluded the units listed under segment 9.

1.2.7 All the eligible enterprises listed under each of segments 1, 2 and 9 were stratified into 2 broad second-stage strata by enterprise type i.e. OAME & NDME/DME. Each of these two broad second-stage strata was further divided into 3 broad manufacturing groups (BMG) i.e. BMG 1, BMG 2 and BMG 3. BMG 1 comprised eligible enterprises belonging to NIC codes 15 and 20. BMG 2 consisted of eligible enterprises belonging to NIC Codes 23, 27, 30-35 and 01405 while all other eligible enterprises belonging to the rest of the NIC codes under coverage formed BMG 3. Thus within a segment for any given sample FSU, six ultimate second-stage strata were formed by jointly considering the broad second-stage strata and BMG. A total of 12 manufacturing enterprises – two from each ultimate second-stage stratum – were selected for detailed enquiry. In case of shortfall of enterprises in the frame of any particular second-stage stratum, compensation was made by selecting additional samples from other second-stage strata so that a total of 12 enterprises were selected from each FSU for detailed enquiry.

1.2.8 Design-based estimates of aggregates for any selected survey characteristic were obtained separately for list frame and area frame. Finally these two sets of estimates were added to get the pooled aggregate estimate for the combined frame. In this report, discussion will be focused on the pooled estimate based on two types of frames used in the survey.

1.3 Items of information and method of data collection

1.3.1 For collection of data from sample manufacturing enterprises, Schedule 2.2 was designed. The schedule was organized into 15 blocks. The format of the schedule is placed as Appendix C of the report. The items of information collected through different blocks of the schedule included the following:

- Particulars of operation and background information of the enterprise
- Principal operating expenses
- Other operating expenses
- Principal receipts
- Other receipts

⁵ Rural sub-strata 1 and 2 consisted of villages having ‘big’ non-ASI registered SSI manufacturing units as per the DCSSI’s census/survey in 2003.

⁶ See Appendix B for details including definition for bigness.

- Gross value added
- Employment particulars
- Compensation to workers
- Fixed assets owned and hired
- Loan outstanding

1.3.2 The above items of information from any enterprise were collected either from books of accounts of the sample enterprises or through oral enquiry depending upon whether the enterprises maintained books of accounts or not. Reference periods used for various items of information are discussed under Chapter Two.

1.4 Sample size and its limitation

1.4.1 Out of 8,000 enterprises selected from the list frame, data could be collected from only 2,260 enterprises (for state/UT wise distribution of allotted and surveyed numbers of enterprises as per the list frame, reference may be made to columns 8 and 9 of Table 1 of Appendix A). Thus a large percentage (72%) of the list frame enterprises became casualties. Among the enterprises which were treated as casualties, the majority (around 70%) actually belonged to the category of “Government/public sector undertaking/ASI units”, which were not under the coverage of 62nd round. Another 18% of the enterprises were found to be either non-operative or not traceable. In the area frame, 80,637 enterprises (42,050 from rural India and 38,587 from urban India) spread over 4,798 villages and 5,125 urban blocks across the country were surveyed. It is important to mention here that even though a large percentage of list frame enterprises became casualty, theoretically the surveyed enterprises netted through the list frame and area frame represented the whole universe of the unorganised manufacturing sector. The estimation procedure developed for the purpose (see Appendix B) also ensured this. As regards segment 9, it was formed only in substrata 1& 2 of rural sector. At all-India level, 462 villages were allotted to sub-stratum 1 and 856 villages to sub-stratum 2. For sub-stratum 2, eight villages became casualty. Only in 241 villages (52% of surveyed villages) of sub-stratum 1 and 549 villages (65% of surveyed villages) of sub-stratum 2, an eligible enterprise was available for survey in segment 9, although for each of such allotted FSUs, a list of at least a few enterprises was made available to field offices for survey through segment 9. For FSUs where at least one eligible enterprise was available in segment 9, at all-India level 1,659 segment 9 enterprises were listed out of which data could be collected from 1,377 enterprises.

1.4.2 Thus, altogether a total of 82,897 unorganised manufacturing enterprises considering both list frame and area frame were surveyed. In the appendix tables, although estimates are presented at disaggregated level i.e. sector (rural/urban/combined) x enterprise type (OAME/NDME/DME/All) by NIC code (for all-India) or by state/UT, sample size at the ultimate level of disaggregating may sometimes be very small. The users are advised to look at the related sample size while using the survey results particularly at the disaggregated level.

1.5 Plan of release of reports

1.5.1 Based on the data collected through the survey on unorganised manufacture, three reports will be brought out. The present one is the first in the series. This report primarily deals with the operational characteristics of the enterprises. The next one will focus on employment, assets and loans while the last report will discuss the details of input, output and value added by the unorganised manufacturing sector.

1.6 Layout of the present report

1.6.1 The report contains three Chapters (including the present introductory one) and three Appendices. Chapter two deals with the concepts and definitions of various terms used in the survey on unorganised manufacture. Chapter three discusses the main findings of the survey based on the data collected through central sample i.e. data collected by the field staff of NSSO. Detailed tables are presented in Appendix A. The sample design and estimation procedure is given in Appendix B while facsimile of the schedule of enquiry is given in Appendix C.

**Table 0: Description of manufacturing activities under the survey coverage of NSS
62nd round**

Division	Description
01405	Cotton ginning, cleaning and baling
15	Manufacture of Food Products and Beverages
16	Manufacture of Tobacco Products
17	Manufacture of Textiles
18	Manufacture of Wearing Apparel; Dressing and Dyeing of Fur
19	Tanning and Dressing of Leather; Manufacture of Luggage, Handbags, Saddlery, Harness and Footwear
20	Manufacture of Wood and of Products of Wood and Cork, Except Furniture; Manufacture of Articles of Straw and Plaiting Materials
21	Manufacture of Paper and Paper Products
22	Publishing, Printing and Reproduction of Recorded Media
23	Manufacture of Coke, Refined Petroleum Products and Nuclear Fuel
24	Manufacture of Chemicals and Chemical Products
25	Manufacture of Rubber and Plastics Products
26	Manufacture of Other Non-Metallic Mineral Products
27	Manufacture of Basic Metals
28	Manufacture of Fabricated Metal Products, Except Machinery and Equipment
29	Manufacture of Machinery and Equipment N.E.C.
30	Manufacture of Office, Accounting and Computing Machinery
31	Manufacture of Electrical Machinery and Apparatus N.E.C.
32	Manufacture of Radio, Television and Communication Equipment and Apparatus
33	Manufacture of Medical, Precision and Optical Instruments, Watches and Clocks
34	Manufacture of Motor Vehicles, Trailers and Semi-Trailers
35	Manufacture of Other Transport Equipment
36	Manufacture of Furniture; Manufacturing N.E.C.
37	Recycling

N.E.C.- Not Elsewhere Classified

Chapter Two

Concepts and Definitions

2.1 Enterprise: An enterprise is an undertaking engaged in the production and / or distribution of some goods and / or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly on a partnership basis, or by an institutional body.

2.2 Manufacturing Enterprise: A manufacturing enterprise is a unit engaged in the physical or chemical transformation of materials, substances or components into new products. It covers units working for other concerns on materials supplied by them. Also included are units primarily engaged in maintenance and repair of industrial, commercial and similar machinery & equipment, which are, in general, classified in the same class of manufacturing as those specialising in manufacturing the goods.

2.3 Unorganised Manufacturing Enterprise: The unorganised manufacturing sector consists of following types of enterprises:

- (i) All manufacturing enterprises except those registered under section 2m(i) and 2m(ii) of Factories Act, 1948 and Bidi and Cigar Workers (conditions of employment) Act, 1966.
- (ii) All manufacturing enterprises except those run by Government (Central Government, State Governments, Local Bodies) / Public Sector Enterprises.

2.4 Household Enterprise: A household enterprise is one which is run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise is located in the premises of the household(s) or not. In other words, all proprietary and partnership enterprises are household enterprises.

2.5 Non-household Enterprise: Non-household enterprises are those which are institutional i.e. owned and run by the public sector (Central or State Government, local self-governments, local bodies, government undertakings, etc.), corporate sector, co-operative societies, other type of societies, institutions, associations, trusts, etc. Non-household enterprises covered under public sector were not included in the current survey.

2.6 Own-account Enterprise: An enterprise, which is run without any hired worker employed on a fairly regular basis⁷, is termed as an own account enterprise. If such an enterprise is engaged in manufacturing and/or repairing activities, it is termed as Own Account Manufacturing Enterprise (OAME).

2.7 Establishment: An enterprise which is **employing at least one hired worker** on a fairly regular basis is termed as establishment. Paid or unpaid apprentices, paid household

⁷ "fairly regular basis" means the major part of the period when operation(s) of an enterprise are carried out during a reference period.

member/servant/resident worker in an enterprise are considered hired workers. Establishments have further been categorised into two types: non-directory and directory.

2.8 Non-directory Establishment: An establishment employing less than six workers (household and hired workers taken together) is termed non-directory establishment. If such an establishment is engaged in manufacturing activities, it is termed Non-Directory Manufacturing Establishment (NDME).

2.9 Directory Establishment: A directory establishment is one which has employed six or more workers (household and hired workers taken together). If such an establishment is engaged in manufacturing activities, it is termed Directory Manufacturing Establishment (DME).

2.10 Perennial Enterprise: Enterprises, which usually operate more or less regularly throughout the year, are called perennial enterprises.

2.11 Seasonal Enterprise: Seasonal enterprises are those which are usually run during a particular season or fixed months of a year.

2.12 Casual Enterprise: Casual enterprises are those which operate occasionally (may be disjoint periods of time throughout the year) but total number of days operated in the last 365 days is 30 days or more.

2.13 Reference Period: The reference period for recording details of various items depended primarily on whether the enterprise under survey could provide information from their books of accounts, or they could provide information orally.

Case 1: Enterprises that provided information by recollection

2.13.1 Here, three kinds of reference periods were used to collect data in different blocks of the schedule viz. *reference month*, *reference year* and *last date of the reference month*.

2.13.2 **Reference Month:** This reference period was used to collect data on various receipts and expenses as well as value added, employment, emoluments, rent and interest payments for the enterprises providing oral information.

For perennial and casual enterprises, 'Reference Month' referred to the last 30 days (preceding the date of survey) *irrespective of the number of days of operation*.

For seasonal enterprises, consider the following two cases-

- **Case 1: Working continuously for 30 days or more (including scheduled holidays) in the current season:** - '*Reference Month*' referred to the last 30 days (preceding the date of survey).
- **Case 2: Worked for less than 30 days in the current season:** - '*Reference Month*' referred to an average month in the last working season.

If an enterprise were unable to provide information for the last 30 days, but could provide it for the latest completed calendar month, this calendar month was considered as '*Reference Month*'.

2.13.3 '*Reference Year*': For items like net additions to fixed assets owned, number of months operated, number of other economic activities pursued etc., data were collected for the entire '*Reference Year*'. It was last 365 days preceding the date of survey, if '*reference month*' of that enterprise was '*last 30 days*'. For the enterprises where '*reference month*' was '*last calendar month*', '*reference year*' was last 12 calendar months taken together. For seasonal enterprises of case 2 above (i.e., seasonal enterprises which had operated for less than 30 days during the current season), '*Reference Year*' was a continuous period of 365 days starting from the first day of the corresponding working season.

2.13.4 '*Last date of the reference month*': For some of the items like value of fixed assets, amount of loan outstanding, etc., the reference period used was as follows:

It was last date of the '*Reference Month*', which was the same as the last date of the '*Reference Year*'. However, opening stock of semi-finished goods manufactured, opening stock of goods traded were collected for the beginning of the first day of the '*Reference Month*'.

Case 2: Enterprises provided data from their books of accounts

2.13.5 In this case, two kinds of reference periods were used to collect data in different blocks of the schedule, '*Reference Year*' and '*last date of the reference year*'.

2.13.6 *Reference Year*: This was the last completed accounting year of the enterprise under survey. Various receipts, expenses, value added as well as employment, emoluments, rent, interest, net additions to fixed assets owned, for the enterprises were recorded for the last completed accounting year.

2.13.7 '*as on first/ last date of reference year*': For some of the items like value of fixed assets, amount of loan outstanding, etc., this reference period was used. It was last date of the '*Reference Year*'. For items like opening stock of semi-finished goods manufactured, opening stock of goods traded, the beginning of the first date of the reference year was the point of reference

2.14 **Worker**: A worker is defined as one who participates either full time or part time in the activity of the enterprise. The worker may serve the enterprise in any capacity - primary or supervisory. He/she may or may not receive wages / salaries in return to his / her work incidental to or connected with the enterprise activity. A worker need not mean that the same person is working continuously; it only refers to a position. Persons working for less than or equal to half of the normal working hours of the enterprise on a fairly regular basis are considered as part time workers. Full time workers are those who work for more than half of the period of normal working hours of the enterprise on a fairly regular basis. Two part-time workers in an enterprise are counted as 2 and not 1.

2.15 Working Owner: The owner who personally works in the proprietary or partnership enterprises on a fairly regular basis is called working owner. In fact, in most of the own-account enterprises the owner himself/ herself manages all activities of the enterprise without the help of anyone (on a fairly regular basis). In the case of partnership enterprises, if only one partner or some of the partners or all the partners work in the enterprise on a fairly regular basis then they are considered as ‘working owners’.

2.16 Hired Worker: A hired worker is a person employed directly or through any agency on payment of regular wage / salary in cash or kind. Apprentices, paid or unpaid, are to be treated as hired workers. Paid household workers, servants and resident workers of the enterprise are also to be considered as hired workers.

2.17 Other Worker / Helper: This includes all persons belonging to the household of the proprietor or households of the partners who are working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages will also be covered in this category. All unpaid household workers / helpers who are associated with the activities of the enterprise during the reference month are considered in this category.

2.18 Mixed Activity: There are enterprises that carry out a number of activities simultaneously. For example, a bakery may also sell cold drinks, a rice mill may sell sugar, a factory may run a hospital in its premises, etc. Each such activity was treated as a separate enterprise if information for them was separately available. If the accounts were not separable then the data pertained to the enterprise as a whole and the enterprise was classified as having mixed activities and the activities of such enterprises are a mixture of NIC’s. The activities may be mixed at any level of NIC, but for the present survey an enterprise was considered to have mixed activities if its activities were different at 2-digit level of NIC-2004. The appropriate NIC in such cases was determined on the basis of **major** activity. Major activity refers to the activity which yielded maximum income/turnover/employment. The above criteria were applied in the given order, i.e., income first, then turnover and then employment, to determine the major activity.

2.19 Multiple Activity: Since many of the entrepreneurs belonging to the unorganised sector operate at small or marginal levels, the phenomenon of carrying out more than one activity simultaneously or at different points of time is quite prevalent. If the activities were carried out at one point of time at the same location and the information was not separately available, then it was taken as “mixed activity”. Carrying out of more than one economic activity by the entrepreneur during the reference year is called multiple activities. *It differs from mixed activities in the sense that former is with respect to the entrepreneur whereas the latter is with respect to the enterprise.* However, an entrepreneur of a manufacturing enterprise manufacturing woollen garments before winter and cotton clothes before summer will not be considered as carrying out multiple activities. Some examples of multiple activities are: i) a person carrying out agricultural activity at sowing / harvesting season and doing carpentry at the same time or at other times, ii) a lady working as regular wage / salary earner and also running a tailoring shop in the evening, etc iii) A household servant is making paper envelopes in free time, iv)

An agricultural worker engaged in handicraft making during non-harvesting season of the year.

2.20 Working on Contract: The enterprises in the unorganised sector are mainly small units. In many cases, the enterprises are seen to be working as per orders from a bigger unit. In such cases, certain conditions are put on the servicing unit by the contractor or master unit. Conditions may pertain to sale of products, supply of raw materials, mode of payment etc. In many cases, the contractor specifies the design of the product to the servicing unit e.g. garment manufacturing, shoe manufacturing etc. If the surveyed enterprise had undertaken any work on contract during the reference year, it was considered as 'enterprises working on contract'.

2.21 Fixed Assets: Assets held for the purpose of producing or providing goods or services and not for resale in the normal course of entrepreneurial activities are classified as fixed assets. These cover all goods, new or used, that have a normal economic life of more than one year from the date of purchase.

2.22 Land and Building: **Land** means the land on which the enterprise is accommodated together with the surrounding area, which is used for the enterprise. This also includes improvement to land. However, if only a portion of the land belonging to the residence of a household is utilised for the enterprise, only that portion of the land is considered as capital assets for the enterprise. Land owned with permanent heritable possession with or without right to transfer the title comes under this category. Land held on long-term lease, say, 30 years or more, is also treated as land owned. **Building** is the structure, where activities of the enterprise are undertaken. This also includes all other structures like shed, house, portions of a house or other structure, building under construction and other conveniences in which the activities of the enterprise are carried out. This also includes other constructions such as passage, wall, water tank, sewerage, tube-well, etc.

2.23 Plant and Machinery: Plant generally means an assembly of machinery / equipment / devices installed for the operation of entrepreneurial activities. Machinery means an implement or mechanical device used in the entrepreneurial activities. These are assets of durable nature and can be easily identified.

2.24 Transport Equipment: All vehicles, power-driven or man / animal-driven, used for transporting persons, goods and materials by the enterprise in connection with its activity are covered in this category. Animals, if used for drawing vehicles or carrying loads, will be treated as part of transport equipment.

2.25 Tools and Other Fixed Assets: Tools refer to small loose implements, generally held in hand for operation and having normal life of more than one year. Other fixed assets refer to other durable equipment which are used for the entrepreneurial activity either directly or indirectly. These include furniture, fixtures, laboratory equipment, office equipment etc. Livestock used in oil-mill is also covered under this category.

2.26 Net additions to fixed assets during the last 365 days: Net addition to fixed assets was obtained by subtracting depletion of assets from the additions made during the last

365 days. Addition to the fixed assets could be made through purchase (new or used) or through own construction. Improvements on land, new construction of building, shed, structure, as well as assets produced on own account during the last 365 days were considered as additions to the fixed assets. Depletion of assets was obtained by considering the assets sold and discarded during the last 365 days. The value of assets disposed of in any manner other than sale, were treated as value of assets discarded. Besides obsolescence (gone out of use) of an asset, this included loss due to theft, damage, accident etc.

2.27 Loan: Any borrowing in cash or kind to be repaid in cash or kind is treated as loan. Loans taken for the purpose of utilising the same in the entrepreneurial activities of an enterprise were considered even if such loans were used for other purposes. On the other hand, loans taken for other purposes but ultimately used in the enterprise were excluded.

2.28 Operating Expenses: The total of values of raw materials, electricity, fuel, lubricants and auxiliary materials consumed; cost of maintenance, services purchased and other expenses incurred during the reference period by an enterprise was considered as 'operating expenses'.

2.29 Receipts: The sale value of products and by-products manufactured by an enterprise together with the value of services rendered to other concerns and other receipts incidental to entrepreneurial activities are considered as 'total receipts'.

2.30 Gross Value Added: Gross value added is taken as additional value created by the process of production of an enterprise to the economy. Gross value added is calculated by deducting 'total operating expenses' from the total value of 'total receipts' during the reference period.

Chapter Three

Summary of Findings

3.1 Introduction: The present report, the first in the series, contains estimates of some operational characteristics of the enterprises engaged in unorganised manufacturing and repairing activities, like their location, status of maintenance of written accounts, registration status, number of months of operation, problems faced, etc. A summary of these results is presented in this section. Detailed tables are given in Appendix A for rural and urban areas and for both areas combined at all India and State / UT levels and by different types of industries. These tables give information relating to Own Account Manufacturing Enterprises (OAMEs), Non-Directory Manufacturing Establishments (NDMEs), Directory Manufacturing Establishments (DMEs) as well as on all types of enterprises taken together. In some cases, the figures for totals and proportions presented in detailed tables may vary marginally due to rounding off. The figures presented in this report are based on 'central sample' i.e. data collected by the field staff of National Sample Survey Organisation.

3.1.1 A few important characteristics as estimated in 62nd (2005-06) round as well as the preceding two rounds i.e. 56th (2000-01) & 51st (1994-95) have been presented in this report to show the extent of change over various survey periods. Although, the coverage of manufacturing and repairing enterprises differed to some extent in the three rounds, they are unlikely to effect any serious distortion in the comparative estimates of rates and proportions presented in this report. However, the difference in coverage is summarised below:

3.1.2 Differences in coverage across rounds -coverage of manufacturing and repairing enterprises in 62nd round & 56th round identical except that "While-you-wait" services under printing of textiles (NIC-98 code 1712) and engraving of metals (NIC-98 code 2892) now classified in NIC-2004 under repair of personal and household goods (NIC-2004 code 52609) were covered in 56th round but not in 62nd round.

Some examples of "While-you-wait" services are:

- i) Households giving new/ old clothes to a shop for block printing, embroidery, etc.
- ii) shop-owners writing name-plates, etc. on metal,
- iii) Boutique shops purchasing *sarees* and doing art-work either themselves or through outsourcing before sale, etc.

3.1.3 Coverage of manufacturing and repairing enterprises in 56th round & 51st round differed in respect of the following activities:

a) activities covered in 51st round but not in 56th round:

- i) Repair and maintenance of computers and computer based systems (NIC 1987 or NIC 87 code 3941),
- ii) Repair of office, computing and accounting machinery other than computers and computer based systems (NIC 87 code 3942),
- iii) Repair of heavy motor vehicles (NIC 87 code 398),
- iv) Repair of household electrical appliances (NIC 87 code 971),
- v) Repair of TV, VCR, radio, transistor, tape-recorder and other electronic appliances (NIC 87 code 972),
- vi) Repair of watches, clocks and jewellery (NIC 87 code 973),
- vii) Repair of motor vehicles and motor cycles except trucks, lorry and other heavy vehicles (NIC 87 code 974),
- viii) Repair of bicycles and cycle

rickshaws (NIC 87 code 975) and ix) Repair enterprises not elsewhere classified (NIC 87 code 979).

b) Cotton ginning, cleaning and baling (NIC 98 code 01405) was covered in 56th round but not in 51st round.

3.1.4 Some of the repairing activities mentioned above were part of manufacturing sector in NIC 87 (15-39) and some were part of services sector (50-97) in NIC 87. However, all these repairing activities were included in the survey on unorganised manufacturing enterprises in 51st round. But all these repairing activities got classified under ‘**services sector (50-93)**’ both in NIC 98 and NIC 2004 which were respectively followed in 56th round and 62nd round.

3.1.5 As the coverage of the survey on unorganised manufacturing enterprises both in 56th round and 62nd round included only industries belonging to NIC Divisions 15-37 as well as NIC code 01405, the above repairing industries got excluded from the coverage of 56th round as well as 62nd round.

3.1.6 So if we now compare the coverage of 51st round and 62nd round, it is apparent that the above repairing activities were covered in 51st round but not in 62nd round. Also Cotton ginning, cleaning and baling (NIC 2004 code 01405) was covered in 62nd round but not in 51st round.

3.1.7 It may be mentioned that repairing activities other than those mentioned above, which were included in NIC 2004 Div. 15 to 37, were covered in 62nd round and also those repairing activities barring the above mentioned ones, which were included in NIC 1998 Div. 15 to 37, were covered in 56th round.

3.2 Number of first stage units surveyed: The number of villages and Urban Frame Survey Blocks (i.e. the first stage units or FSUs) allotted and actually surveyed in different State / UTs is given in **Statement 1**. It is seen from **Statement 1** that out of a total number of 9997 allotted villages/UFS blocks, 9923 units could be surveyed, the rest 74 units (FSUs) being casualties (0.74% of allotted FSUs).

3.3 Number of enterprises surveyed: Before looking into the various characteristics of the enterprises estimated from the survey, it is important to note the number of enterprises surveyed in the 62nd round. **Statement 2** gives information on the number of enterprises surveyed state-wise for rural, urban and both sectors combined for the country. A total of 82897(including 2260 list frame enterprises located in urban areas) enterprises were surveyed all over India. About 51% of these enterprises were in rural India and the remaining 49% were in urban India. List frame enterprises constituted only 5.5% of urban enterprises surveyed, the rest 94.5% being area frame enterprises. Maximum number of enterprises (both list frame and area frame enterprises) surveyed was in Uttar Pradesh (9.95%) followed by West Bengal (7.97%), Tamil Nadu (7.96%), Andhra Pradesh (7.93%) and Maharashtra (7.76%). However, the highest percentage of list frame enterprises surveyed was in Maharashtra (21.1%) followed by Uttar Pradesh (10.9%), Haryana (9.8%), Rajasthan (8.7%), Tamil Nadu (8.6%).

3.4 Estimated number of enterprises: Statement 3 gives the estimated number of unorganised manufacturing enterprises categorised by enterprise types for rural, urban, combined sectors of each State / UT. In the total enterprises, rural India had a share of 71% while urban India had 29% share. In rural India, shares of OAMEs, NDMEs &

DMEs were respectively 92%, 6% & 2% and for urban India the percentages were 71%, 21% & 8% respectively.

Statement 3: Estimated number of enterprises in different States/UTs, separately by sector and type of enterprise

See Appendix Table 3 for more detail

3.5 **Statement 3A** gives the estimated number of OAMEs and establishments (NDME & DME) **separately** for rural , urban and combined sectors of the country. As expected, OAMEs dominated the unorganised manufacturing enterprises in rural, urban and combined sectors of the country. **Chart 1** gives the percentage of OAMEs,NDMEs and DMEs in total number of enterprises. The share of OAMEs is about 86%, the remaining 14% being establishments. The share of NDMEs and DMEs were respectively 10% and 4% in total number of enterprises.

Statement 3A: Estimated number of enterprises categorised by enterprise type and sector at all-India level			
enterprise type	estimated number of enterprises		
	rural India	urban India	all-India
OAME	11108720	3504186	14612907
Establishments			
• NDME	745269	1025013	1770282
• DME	274277	413355	687632
• Total	1019546	1438368	2457914
All	12128266	4942554	17070820

3.6 **Statement 3B** gives the estimated total number of enterprises in descending order in States / Uts. It is seen that during 2005-06 West Bengal had the highest share (16%) of unorganised manufacturing enterprises. The two states, West Bengal & Uttar Pradesh together had 30 percent share of all unorganised manufacturing enterprises in the country. However, OAMEs had significantly contributed to total number of enterprises in the top state West Bengal, its percentage being 88%. In contrast, Uttar Pradesh had higher number of establishments than West Bengal but had lower number of OAMEs, as a result of which it got pushed down to the second position. This fact is also noticed in case of next two states in sequence i.e. Andhra Pradesh & Tamilnadu. Maximum number of establishments is noticed in Uttar Pradesh (13.3%) followed by West Bengal (12.9%), Tamilnadu (11.9%), Maharashtra (11.6%), Andhra Pradesh (6.9%). Share of top five states i.e. West Bengal, Uttar Pradesh, Andhra Pradesh, Tamilnadu, Maharashtra in total number of establishments (56.6%) is higher than its share in total number of enterprises (54.2%). These five states also had a share of 53.8% in total number of OAMEs.

Statement 3B: Estimated number of enterprises in descending order in different States/UTs,				
State / UT	estimated number of enterprises			% share
	OAME	Establishment	All (in descending order)	
West Bengal	2434547	318246	2752793	16.13

3.7 **Statement 3C** gives the estimated number of enterprises in descending order in different industries at two-digit level of NIC-2004 at all-India level. It reveals that among all unorganised manufacturing enterprises 'Manufacture of Wearing Apparel; Dressing and Dyeing of Fur (NIC Div.18)' was the most prominent activity having a share of 19%, which was closely followed by 'Manufacture of Tobacco Products (NIC Div.16)' (16%). About 78% of all enterprises were concentrated in five industries viz. 'Manufacture of Wearing Apparel; Dressing and Dyeing of Fur (NIC Div.18)', 'Manufacture of Tobacco Products (NIC Div.16)', 'Manufacture of Food Products and Beverages (Div.15)', 'Manufacture of Textiles (NIC Div.17)', 'Manufacture of Wood and of Products of Wood and Cork, Except Furniture; Manufacture of Articles of Straw and Plaiting Materials (NIC Div.20)' and the rest (22%) were distributed over other industries.

Statement 3C: Estimated number of enterprises in descending order in different industries at all-India level

Industry division (NIC2004)	estimated number of enterprises	% share
(1)	(2)	(3)
18	3213869	18.83

See Appendix Table 4 for more detail.

3.8 **Statement 4A** gives the estimated number of workers in descending order in States / Uts. It is seen that West Bengal had the highest share (15%) of workers in unorganised manufacturing enterprises of the country closely followed by Uttar Pradesh (14%). About 55% of all workers were concentrated in five states viz. West Bengal, Uttar Pradesh, Tamil Nadu, Andhra Pradesh, Maharashtra. Here also OAMEs had significantly contributed to total number of workers in the top state West Bengal, its percentage being 72%. However, Maharashtra had highest share (13%) of total number of workers of all the establishments of all states.

Statement 4A: Estimated number of workers in descending order in different States/UTs,				
State / UT	estimated number of workers			% share
	OAME	Establishment	All (in descending order)	
West Bengal	3980082	1513751	5493833	15.08

3.9 **Statement 4B** gives the estimated number of workers in descending order in different industries at two-digit level of NIC-2004 at all-India level. Five Industry Divisions together engaged about 71% of all workers in unorganised manufacturing enterprises of the country These were ‘Manufacture of Food Products and Beverages (Div.15)’ (17%), ‘Manufacture of Textiles (Div.17)’ (17%), ‘Manufacture of Wearing Apparel; Dressing and Dyeing of Fur (Div.18)’ (14%), ‘Manufacture of Tobacco Products (Div.16)’ (12%), and ‘Manufacture of Wood and of Products of Wood and Cork, Except Furniture; Manufacture of Articles of Straw and Plaiting Materials (Div.20)’ (11%). The remaining 19 industries engaged about 29% of all workers.

Statement 4B: Estimated number of workers in descending order in different industries at all-India level		
Industry division (NIC2004)	estimated number of workers	% share
(1)	(2)	(3)
15	6345768	17.41

See Appendix Table 6 for more detail.

3.10 **Statement 5** provides certain key information at all-India level for the current and two previous rounds relating to survey on unorganised manufacturing enterprises. It is seen that though estimated number of enterprises in rural areas went up from the period 1994-95 to 2005-06, the same in urban areas declined from the period 2000-01 to 2005-06. Also both for rural and urban areas, estimated number of workers went up from 1994-95 to 2000-01 and then declined in 2005-06. However, average number of workers per enterprise declined over the period from 1994-95 to 2005-06 both for rural areas and all-India, though for urban areas it was marginally higher in 2005-06 as compared to 2000-01.

Statement 5: Summary information over the last three rounds at all-India level				
		51st round (1994-95)	56th round (2000-01)	62nd round (2005-06)

- @ excluding 2260 list frame enterprises

3.11 **Nature of operation: Statement 6** gives the percentage distribution of enterprises by nature of operation of the enterprise. About 94% of all enterprises operated on perennial basis. The seasonal enterprises were seen a little more prevalent in rural areas as compared to urban areas as they constituted about 5% of total number of enterprises in rural areas and about 2 % in urban areas. The proportion of casual enterprises did not differ significantly between rural and urban areas, as the respective percentages were 2% and 1% only.

Statement 6: Percentage distribution of enterprises by nature of operation separately by sector and type of enterprise

nature of operation	percentage of enterprises											
	rural India				urban India				all-India			
	OAME	NDME	DME	all	OAME	NDME	DME	all	OAME	NDME	DME	all

3.12 **Change in nature of operation during the period 2000-2006: Statement 6A** gives the percentage distribution of enterprises by nature of operation of the enterprise at all-India level in NSS 56th & 62nd rounds. It is seen that proportion of perennial, seasonal, casual enterprises did not change much between the two rounds.

Statement 6A: Percentage distribution of enterprises by nature of operation separately by sector and type of enterprise in NSS 56th & 62nd rounds

nature of operation	percentage of enterprises							
	all-India							
	OAME		NDME		DME		all	
	56 th round (2000-01)	62 nd round (2005-06)	56 th round (2000-01)	62 nd round (2005-06)	56 th round (2000-01)	62 nd round (2005-06)	56 th round (2000-01)	62 nd round (2005-06)

3.13 Type of ownership of enterprises: **Statement 7** gives the percentage distribution of enterprises by type of ownership separately for rural, urban and combined sectors of the country. It reveals that about 98% of all unorganised manufacturing enterprises were proprietary enterprises only. About 61% of all enterprises were proprietary enterprises owned by males while about 37% of all enterprises were proprietary enterprises owned by females. It is interesting to see that percentages of proprietary enterprises in rural enterprises and urban enterprises were nearly equal being 98% and 97% respectively. Only about 2% & 3% of the enterprises in rural & urban areas were operated on partnership basis. About 89% of DMEs in rural areas and 84% of DMEs in urban areas were proprietary enterprises only. Apart from proprietary and partnership enterprises, 'other' enterprises had a negligible share in total number of unorganised manufacturing enterprises.

See Appendix Table 5 for more detail

3.14 **Location of the enterprises: Statement 8** gives the percentage distribution of enterprises by location. It was found that 97% of all enterprises were operated at fixed premises either within the household premises or outside. The proportion of enterprises run in the household premises was higher (81%) in the case of OAMEs as compared to NDMEs (27%) and DMEs (17%). Further, a higher proportion of enterprises were operated from the household premises in rural areas (79%) when compared with urban areas (58%). The proportion of enterprises operating from permanent structures located outside the household premises was much higher in case of urban areas (38%) as compared with rural areas (15%). However, the proportion of OAMEs operating without fixed location did not differ very significantly from NDMEs & DMEs, the percentages being 3.2%, 1.8% and 0.4% respectively.

Statement 8: Percentage distribution of enterprises by location, separately by sector and type of enterprise

location of enterprise (1)	percentage of enterprises											
	rural India				urban India				all-India			
	OAME (2)	NDME (3)	DME (4)	all (5)	OAME (6)	NDME (7)	DME (8)	all (9)	OAME (10)	NDME (11)	DME (12)	all (13)

See Appendix Table 7 for more detail

3.15 Distribution of workers by type of ownership of enterprises: The percentage distribution of workers by type of ownership of enterprises separately for rural, urban and combined sectors of the country is given in **Statement 9**. It reveals that 94% of workers in unorganised manufacturing enterprises were working in proprietary enterprises only. About 70% of total workers were employed in proprietary enterprises owned by males and 24% in proprietary enterprises owned by females. Though percentages of workers working in proprietary enterprises owned by males for rural areas, urban areas & all-India were nearly the same, the corresponding percentages for proprietary enterprises owned by females were 27%, 20% & 24% respectively.

Statement 9: Percentage distribution of workers by type of ownership of enterprises separately by sector and type of enterprise

type of ownership	percentage of workers											
	rural India				urban India				all-India			
	OAME	NDME	DME	all	OAME	NDME	DME	all	OAME	NDME	DME	all

*others included co-operative society, limited company (outside public sector) and others.

See Appendix Table 10 for more detail

3.16 Maintenance of accounts: Statement 10 gives the percentage of enterprises maintaining accounts. Only 5% of the manufacturing enterprises reported to have maintained accounts. Actually less than 1% of all unorganised manufacturing enterprises provided data from books of accounts while about 4% of enterprises did maintain accounts but did not provide data from it. About 3% of the OAMEs, that constituted a majority of the enterprises, had reported maintaining accounts. As expected, the percentage of enterprises reporting maintenance of accounts was higher in the case of DMEs (32 %) as compared to the NDMEs (11%). However, only 11% of DMEs provided data from books of accounts. The proportion of enterprises maintaining accounts was higher in urban areas (9%) as compared to rural areas (4%).

Statement 10: Percentage of enterprises maintaining accounts, separately by sector and type of enterprise

sector	enterprise type	maintenance of accounts				
		accounts usually maintained		no usable books of accounts maintained	n.r.	all
		data recorded from books of accounts	data provided orally			
(1)	(2)	(3)	(4)	(5)	(6)	(7)

	all	0.7	4.4	94.6	0.2	100.0

See Appendix Table 12 for more detail

3.17 Specific problems faced in operation: Information on different types of problems faced by the unorganised manufacturing enterprises in their day-to-day operation was collected. This information was collected in two ways. Information was obtained on whether the enterprise faced any of the specific problems namely, 'non-availability of electricity connection', 'problem of power cut' etc. as a dichotomous response (i.e. as 'yes' or 'no'). If an enterprise reported to have faced 'any other problem', the same was recorded in terms of seven codes namely, local problems/ harassment-1, competition from larger units-2 etc (vide page C-2, Appendix C). Estimates obtained from the responses given regarding problems faced in day-to-day operation are given in **Statement 11**. About 32 % of all enterprises reported not having faced any specific problem in their day-to-day operation. Although this item (no specific problem) was collected under 'any other problem', the percentage shown against item 3 excludes such enterprises. The shortage of capital was reported to be the dominant problem faced by 42 % enterprises followed by other non-specific problems (30 %) and problem of marketing of products (18 %). The 'problem of power cut' was reported more often by the larger enterprises (NDMEs and DMEs) than OAMEs. However, the smaller ones, i.e., the OAMEs reported more often, especially in rural areas, the problem of 'non-availability of electricity connection' than NDMEs & DMEs.

Statement 11: Percentage of enterprises reporting some specific problems, separately by sector and type of enterprise

type of problem faced	percentage of enterprises reporting specific problems											
	rural India				urban India				all-India			
	OAME	NDME	DME	all	OAME	NDME	DME	all	OAME	NDME	DME	all

* excludes 'no specific problem'

See Appendix Table 14 for more detail

3.18 **Status of registration: Statement 12** gives the distribution of enterprises by status of registration. About 10% of all enterprises were registered with a registration agency. The percentage of registered OAME was 5% whereas the percentage of registered NDME and DMEs were 34% and 49% respectively at all-India level. The overall proportion of registered enterprises was much higher in urban areas (19%) as compared to rural areas (6%). It can be seen from detailed Table 13 (Appendix A) that among all enterprises, registration with local bodies (7.1%) had the highest percentage, followed by District Industries Centre (1.8%) and others (1.6%).

Statement 12: Distribution of enterprises by status of registration under/with any Act / Authority separately by sector and type of enterprise

status of registration	percentage of enterprises											
	rural India				urban India				all-India			
	OAME	NDME	DME	all	OAME	NDME	DME	all	OAME	NDME	DME	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)

See Appendix Table 13 for more detail

3.19 **Number of months operated: Statement 13** gives the distribution of enterprises by number of months operated during the last 365 days. About 81% of the enterprises had worked for 9 months or more during the last 365 days, while about 4% of the enterprises had operated for less than a quarter of the last year. More enterprises in urban areas had operated for longer duration than in rural areas. In urban areas, the percentage of enterprises having specified duration of operation did not vary much among the three types of enterprises. In rural areas, however, these percentages varied among the three types of enterprises. As an example, proportion of DME units (43%) having operated for 6 months or less is much higher as compared to corresponding proportions in OAMEs (11%) & NDMEs (11%).

Statement 13: Percentage distribution of enterprises by number of months operated during the last 365 days, separately by sector and type of enterprise

no. of months of operation	percentage of enterprises											
	rural India				urban India				all-india			
	OAME	NDME	DME	all	OAME	NDME	DME	all	OAME	NDME	DME	all

See Appendix Table 19 for more detail

3.20 **Type of assistance received: Statement 14** gives the proportion of enterprises receiving assistance separately by type of assistance received. Only about 8 % of the enterprises had reported receiving assistance of any kind. About 4 % and 3 % of enterprises received assistance in the form of institutional loans and non-institutional loans respectively. The DMEs reported assistance in the form of loans more often than NDMEs, which, in turn, received assistance more often than OAMEs. Proportion of enterprises not receiving any assistance is highest (95%) in case of OAMEs followed by NDMEs (81%) and DMEs (70%).

Statement 14: Percentage of enterprises receiving assistance by type of assistance received, separately by sector and type of enterprise

type of assistance received	percentage of enterprises reporting

See Appendix Table 16 for more detail.

3.21 **Enterprises pursuing mixed activity: Statement 15** presents the percentage of enterprises pursuing mixed activity by sector and type of enterprise. It is seen that this percentage for rural, urban and combined sectors was about 3 % in all the three cases. However, among enterprises pursuing mixed activity OAMEs had the largest share (76%) followed by NDME (20%), DME(4%).The same sequence prevailed in rural and urban areas.

Statement 15: Percentage distribution of enterprises pursuing mixed activity by sector and type of enterprise

sector	percentage of enterprises pursuing mixed activity	among enterprises pursuing mixed activity percentage distribution by type of enterprise			
		OAME	NDME	DME	all
(1)	(2)	(3)	(4)	(5)	(6)
rural India	3.3	86.2	12.7	1.1	100.0
urban India	3.6	51.7	36.0	12.3	100.0
all- India	3.4	75.6	19.8	4.5	100.0

See Appendix Table 17 fore more detail

3.22 **Growth status of the enterprise over the last three years: Statement 16** summarises the information on the growth status of enterprise over last three years. This information was collected to get the owner's perception about the growth of the enterprise in recent past. About 19% of entrepreneurs felt that their business activities had expanded over the three years preceding the date of survey. On the other hand, about 15% of entrepreneurs felt that their business had contracted over the last three years. However, about 54% of entrepreneurs felt that their enterprises had been stagnant during the last three years.

Statement 16: Percentage distribution of enterprises by growth status over the last three years, separately by sector and type of enterprise

growth status of the enterprise	percentage of enterprises											
	rural India				urban India				all-India

* not applicable means 'enterprises had operated for less than three years'.

See Appendix Table 18 for more detail

3.23 **Working on contract: Statement 17** gives the distribution of enterprises by status of working on contract. About 32 % of the total unorganised manufacturing enterprises were estimated to have undertaken at least some work on contract basis. About 27% of all enterprises worked on contract solely for master unit or contractor. The proportion of enterprises working on contract was slightly higher in urban areas (35%) in comparison to rural areas (30%). Proportion of OAMEs (33%) working on contract was higher than NDMEs (25%) & DMEs (30%). More OAMEs (29%) were working on contract solely for master unit or contractor than NDMEs (16%) & DMEs (21%).

Statement 17: Percentage distribution of enterprises by status of working on contract, separately by sector and type of enterprise

status	percentage of enterprises			
	OAME	NDME	DME	all

See Appendix Table 15 for more detail

3.24 Other economic activities undertaken: Statement 18 presents the distribution of enterprises by other economic activities undertaken during the last 365 days. Since many of the enterprises in the unorganised manufacturing sector operate at a low level of activity, information on whether the entrepreneur had undertaken other economic activities simultaneously or at different points of time during the last 365 days was collected. These other economic activities included any economic activity such as self-employment in agriculture, wage employment, etc. It is seen that about 70 % of OAMEs did not undertake any such additional activity during the last 365 days while about 83 % of both NDMEs and DMEs also did not undertake any such activity. For all categories of enterprises i.e. OAMEs, NDMEs, DMEs, it is noticed that a higher proportion of enterprises in rural areas had undertaken additional activities than their counterparts in urban areas. Also for both rural and urban areas, OAMEs (rural 36%; urban 10%) had outnumbered establishments i.e. NDMEs (rural 27%; urban 9%), DMEs (rural 31%; urban 7%), in terms of taking up additional activities. Among the OAMEs about 18% of enterprises reported receiving their major income by pursuing activities other than the activity of the surveyed enterprise while the corresponding percentages for NDMEs & DMEs were 8% and 7%.

Statement 18: Percentage distribution of enterprises by other economic activities and major source of annual income of the owner/major partner (for proprietary and partnership enterprises)

sector	enterprise type	owner pursuing single activity	owner pursuing multiple activity		all
			and major income coming from the surveyed enterprise	and major income not coming from the surveyed enterprise

See Appendix Table 21 for more detail

NSS Report No 524: Operational Characteristics of Unorganised Manufacturing Enterprises in India, 2005-06

3.25 Type of other economic activity providing major annual income: Statement 19 presents the distribution of enterprises whose owners' major source of annual income was from other economic activities by type of other economic activities during the last 365 days. It reveals that more unorganised manufacturing enterprises derived major annual income by pursuing other economic activities relating to 'agriculture, hunting, forestry, fishing, mining and quarrying (sec. A to C)' than the remaining industries taken together. About 77% of enterprises whose owners' major source of annual income was from other economic activities derived it from 'agriculture, hunting, forestry, fishing, mining and quarrying (sec. A to C)', 9 % from 'manufacturing, gas, steam and hot water supply, construction (sec. D to F)', 10% from 'tertiary sector (sec.G to O for enterprise survey)' and 4% of enterprises did not report the industries from which they derived their major income. These percentages are almost identical for OAMEs. However, for NDMEs & DMEs percentage of enterprises deriving major income from 'manufacturing, gas, steam and hot water supply, construction (sec. D to F)' and tertiary sector taken together is significantly higher than that for OAMEs, the percentages being NDMEs (43%), DMEs (36%), OAMEs(17%).

Statement 19: Percentage distribution of enterprises whose owners' major source of annual income was from other economic activities by type of other economic activities undertaken (for proprietary and partnership enterprises)

economic activity providing major annual income	percentage of enterprises			
	OAME	NDME	DME	all
(1)	(2)	(3)	(4)	(5)
agriculture, hunting, forestry, fishing, mining and quarrying (sec. A to C, NIC 2004)	79.3	48.5	61.9	77.4
manufacturing, gas, steam and hot water supply, construction (sec. D to F, NIC 2004)	8.2	16.6	13.3	8.7
wholesale and retail trade (sec. G, NIC 2004)	5.2	16.6	9.4	5.9
other service sector activities (sec. H to O, NIC 2004)	3.6	10.0	12.9	4.0
n.r.	3.7	8.3	2.6	3.9
all	100.0	100.0	100.0	100.0

See Appendix Table 23 for more detail

3.26 Comparative estimates of important characteristics: Statement 20 gives comparative estimates of important characteristics as obtained in the recent three rounds. It is seen that percentage of enterprises for each sector did not change significantly over the three rounds. Also OAMEs and proprietary enterprises dominated the unorganised manufacturing enterprises in all the three surveys. While share of OAMEs remained around 85% in the three surveys, share of proprietary enterprises in total number of unorganised manufacturing enterprises had gone up from 95% in 1994-95 to 98% in both 2000-01 & 2005-06. While the 'percentages of enterprises not registered with any agency' had increased during the period from 1994-95 to 2005-06, the 'percentage of enterprises without fixed premises' had declined during the same period. Percentage of enterprises operating perennially also went up from 91% (1994-95) to 94% (2005-06). However, share of top five states in total number of unorganised manufacturing enterprises declined to some extent from about 57% to about 54%. Uttar Pradesh which had the highest share (18%) in 1994-95 went down to second position in both 2000-01 (13%) & 2005-06 (14%). In contrast, West Bengal which had the second highest share (13%) in 1994-95 moved to the top position in both 2000-01 (16%) & 2005-06 (16%). It is remarkable that top five states were identical in 2000-01 and 2005-06 and their percentage shares in total number of unorganised manufacturing enterprises had remained almost same in 2000-01 & 2005-06.

Statement 20: Some important characteristics over the last three rounds at all-India level						
	51st round (1994-95)		56th round (2000-01)		62nd round (2005-06)	
	Percentage of enterprises (sector-wise)	R	72.3	R	70.1	R
	U	27.7	U	29.9	U	29.0
Percentage of OAMEs in total number of enterprises	84.5		86.2		85.6	
Percentage of proprietary enterprises	95.2		98.4		97.8	
Percentage of enterprises not registered with any agency	88.3		90.1		90.3	
Percentage of enterprises without fixed premises	5.5		4.7		3.0	
Percentage of enterprises operating perennially	91.0		92.7		93.9	
Share of top five states in total number of enterprises	U.P	17.87	W.B	16.27	W.B	16.12

Appendix B
Coverage, Sample Design,
Estimation Procedure

Coverage, Sample Design and Estimation Procedure

1.0 Introduction:

1.0.1 The National Sample Survey (NSS), set up by the Government of India in 1950 to collect socio-economic data employing scientific sampling methods started its sixty-second round from 1st July, 2005. The survey continued upto 30th June 2006.

1.0.2 Following the first Economic Census 1977, small establishments and enterprises not employing any hired worker [and henceforth called 'own account enterprises' (OAEs)] engaged in manufacturing and repairing activities were surveyed on sample basis in the thirty-third round of NSS during 1978-79.

1.0.3 As a follow-up to the second Economic Census 1980, own account enterprises and Non-directory Establishments engaged in manufacturing and repairing activities (i.e., OAMEs and NDMEs respectively) were surveyed in the fortieth and forty-fifth rounds of NSS during July 1984-June 1985 and July 1989-June 1990 respectively. The Directory Manufacturing Establishments (DMEs) were surveyed during October 1984-September 1985 and October 1989 to September 1990 respectively by a group of special staff (Assistant Superintendents only) of the Field Operations Division (FOD) of the NSSO under the technical direction of the CSO.

1.0.4 As a follow-up to the third Economic Census 1990, the first *integrated* survey on unorganised manufacturing and repairing enterprises covering OAMEs, NDMEs and DMEs was undertaken during the fifty-first round of NSS (July 1994-June 1995).

1.0.5 Following this, two other surveys were undertaken – (i) Special Enterprise Survey on enterprises in the unorganised sector during the period August 1998 to June 1999 and (ii) Informal sector enterprises as part of NSS 55th round during July 1999 to June 2000. Manufacturing sector was part of coverage in both these surveys.

As a follow up of fourth Economic Census 1998, survey of manufacturing enterprises in the unorganised sector was conducted in the 56th round of NSS during July 2000 to June 2001.

1.1 **Subject Coverage:** The 62nd round (July 2005 - June 2006) of NSS was earmarked for survey on (i) **unorganised** manufacturing enterprises under the two-digit codes 15 to 37 (Section 'D') of NIC-2004 and enterprises under cotton ginning, cleaning and baling (NIC-2004, code 01405), (ii) annual survey of consumer expenditure and (iii) survey on employment – unemployment.

Following activities have been classified under Manufacturing (NIC –2004 Section D):

<u>Division</u>	<u>Description</u>
15	Manufacture of Food Products and Beverages
16	Manufacture of Tobacco Products
17	Manufacture of Textiles
18	Manufacture of Wearing Apparel; Dressing and Dyeing of Fur
19	Tanning and Dressing of Leather; Manufacture of Luggage, Handbags, Saddlery, Harness and Footwear
20	Manufacture of Wood and of Products of Wood and Cork, Except Furniture; Manufacture of Articles of Straw and Plaiting Materials
21	Manufacture of Paper and Paper Products

<u>Division</u>	<u>Description</u>
22	Publishing, Printing and Reproduction of Recorded Media
23	Manufacture of Coke, Refined Petroleum Products and Nuclear Fuel
24	Manufacture of Chemicals and Chemical Products
25	Manufacture of Rubber and Plastics Products
26	Manufacture of Other Non-Metallic Mineral Products
27	Manufacture of Basic Metals
28	Manufacture of Fabricated Metal Products, Except Machinery and Equipment
29	Manufacture of Machinery and Equipment N.E.C.
30	Manufacture of Office, Accounting and Computing Machinery
31	Manufacture of Electrical Machinery and Apparatus N.E.C.
32	Manufacture of Radio, Television and Communication Equipment and Apparatus
33	Manufacture of Medical, Precision and Optical Instruments, Watches and Clocks
34	Manufacture of Motor Vehicles, Trailers and Semi-Trailers
35	Manufacture of Other Transport Equipment
36	Manufacture of Furniture; Manufacturing N.E.C.
37	Recycling

Thus survey on **unorganised** manufacturing enterprises covered:

- (a) Manufacturing enterprises not registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948
- (b) Manufacturing enterprises registered under Section 85 of Factories Act, 1948
- (c) Non-ASI enterprises engaged in cotton ginning, cleaning and baling (NIC- 2004, code 01405)
- (d) Non-ASI enterprises manufacturing bidi and cigar (those registered under bidi and cigar workers (condition of employment) Act, 1966 as well as those un-registered)

and excluded:

- (a) Repairing enterprises not falling under Section 'D' of NIC- 2004
- (b) Departmental units such as Railway Workshops, RTC Workshops, Government Mint, Sanitary, Water supply, Gas, Storage, etc. in line with ASI coverage
- (c) Units covered under ASI
- (d) Public Sector Units

1.2 Geographical coverage: The survey covered the whole of the Indian Union *except* (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

1.3 Period of survey and work programme: The period of survey was of one year duration starting on 1st July 2005 and ending on 30th June 2006. The survey period of this round was divided into four sub-rounds of three months' duration each to spread the survey workload uniformly. The sub-rounds were as follows:

- sub-round 1 : July - September 2005
- sub-round 2 : October - December 2005
- sub-round 3 : January - March 2006
- sub-round 4 : April - June 2006

Because of the arduous field conditions, sub-round restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep, rural areas of Arunachal Pradesh and Nagaland.

1.4 Schedules of enquiry: During this round, the following schedules of enquiry were canvassed:

Schedule 0.0	: list of households and non-agricultural enterprises
Schedule 2.2	: manufacturing enterprises
Schedule 1.0	: consumer expenditure
Schedule 10	: employment and unemployment

1.5 Participation of States: In this round all the States and Union Territories except Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep participated at least on an equal matching basis. The following was the matching pattern of the participating States/ UTs.

Nagaland (U)	: triple
J & K, Manipur & Delhi	: double
Goa, Maharashtra (U), Kerala	: one and half
Remaining States/ UTs	: equal

2 Sample Design

2.1 Outline of sample design: Two frames were used for the 62nd round survey viz. List frame and Area frame.

2.1.2 List frame: This was used only for urban sector and that too for selection of manufacturing enterprises only. For unorganised manufacturing enterprises, a list of about 8000 big non-ASI manufacturing units in the urban sector prepared on the basis of the data of the census of manufacturing enterprises conducted by Development Commissioners of Small Scale Industries (DCSSI) in 2003 was used as list frame.

The 'big' DCSSI units in the urban sector had been identified by the criteria given below:

- (1) From the list of registered SSI units, units not registered under sections 2m(i) or 2m(ii) of Factories Act, 1948 and belonging to NIC '98 codes 01405, 15 – 37 were considered.
- (2) Out of the above units, the units whose gross value of output in 2001 were more than 6 times the average output (Rs. 14,32,314) of all urban SSI units were separated out.
- (3) From the above units, those with 6 or more workers were identified as the big units for list frame. About 8000 such units constituted the list frame.

All these units in the list frame were to be surveyed and there was not any sampling for list frame. To avoid duplication, these units were excluded from the list of enterprises prepared in the selected urban blocks/villages drawn from the area frame. There was no sub-round restriction for the list frame units.

All the enterprises in the list frame are common to both central and state samples.

2.1.3 Area frame: This was adopted for both rural and urban sectors. The list of villages as per census 2001 (for Manipur, 1991 census was used since 2001 census list was not available) was used as frame for the rural sector and the latest available list of UFS blocks was used as frame in the urban sector. However, EC-98 was used as frame for the 27 towns with population 10 lakhs or more (as per Census 2001).

A stratified multi-stage design had been adopted for the 62nd round survey. The first stage units (FSU) were the 2001 census (for Manipur, 1991 census) villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households/ unorganised-manufacturing enterprises (OAME/ NDME/ DMEs), in both the sectors. In the case of large villages/ blocks requiring hamlet-group (hg)/ sub-block (sb) formation, one intermediate stage was the selection of two hgs/ sbs from each FSU.

2.1.4 Stratification: Within each district of a State/ UT, two basic strata were formed:

i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them also formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum. There are 27 towns with population 10 lakhs or more at all-India level as per census 2001.

2.1.5 Sub-stratification for area frame:

2.1.5.1 Rural sector:

Development Commissioner of Small Scale Industries (DCSSI) conducted a survey of all Small Scale Industries (SSI) units in 2003 covering all registered SSI units on a census basis and other SSI units on a sample basis. 9306 villages having a 'big' non-ASI registered SSI manufacturing unit as per DCSSI census had been identified by matching the identification particulars of census 2001 with those of DCSSI census.

'Big' DCSSI unit, on the basis of which villages had been identified, satisfied the conditions:

- (a) It was a registered SSI unit in rural area as per DCSSI census belonging to NIC '98 codes 01405, 15 – 37 and it was not registered under sections 2m(i) or 2m(ii) of Factories Act, 1948 and
- (b) It had 6 or more workers.

A subset of these 9306 villages having 'bigger' non-ASI registered SSI manufacturing unit had been considered for formation of a separate sub-stratum (termed as sub-stratum 1). The 'bigger' registered SSI units were those which, in addition to fulfilling the criteria (a) and (b) above, satisfied the criteria:

- (c) The SSI unit had gross value of output in 2001 more than the average output (Rs. 7,52,159) of rural SSI units identified in (a) and (b) above and
- (d) The SSI unit had 11 or more workers and

- (e) The output of the SSI unit had been continuously increasing over the last three years between 1999 and 2001.

Sub-stratum 1 villages had been identified at the State/ UT level after arranging the above villages in descending order of total of gross output of the bigger registered SSI units in the village during these three years and selecting the required number of them from the top.

Obviously, the district containing any such villages had sub-stratum 1. The total number of such sub-stratum 1 villages at all-India level was 462.

2.1.5.2 Sub-stratification of rural areas of each district comprised the following:

sub-stratum 1: The villages in the district which belonged to the list of 462 villages.

sub-stratum 2: The villages in the district which were not in sub-stratum 1 but belonged to the set of 9306 villages.

sub-stratum 3, 4, 5, ... : Remaining FSUs of the district were first arranged in ascending order of census 2001 population. Then $n/2$ sub-strata, n being the stratum allocation excluding the allocations for sub-strata 1 & 2, were formed in such a way that each sub-stratum had more or less equal population.

Sub-strata 1 & 2 were not formed in Kerala. Also sub-strata 1/ sub-strata 2 were not formed for some smaller States/ UTs.

2.1.5.3 **Urban sector:**

(a) For the 27 cities where EC-98 frame was used: Two sub-strata were formed within each stratum based on EC-98 information as under:

sub-stratum 1: all FSUs (i.e. UFS blocks as per the EC-98) with at least one DME or NDME in the unorganised sector.

sub-stratum 2: remaining FSUs.

(b) For towns where latest phase of UFS were used: Two sub-strata were formed as follows:

sub-stratum 1: all FSUs (i.e. UFS blocks as per the latest UFS) identified as Industrial Area (IA) or Bazar Area (BA) or Slum Area (SA).

sub-stratum 2: remaining FSUs

2.1.6. **Total sample size:** 9997 FSUs (rural & urban combined) for area frame and 8000 manufacturing units for list frame (urban only) were allocated at all-India level for central sample on the basis of investigator strength. For state sample 10518 FSUs were allocated for area frame. List frame units for the state sample were the same as those in the central sample.

2.1.7 **Allocation of samples to rural & urban sector:** The allocation between rural and urban sectors had been made in proportion to the number of unorganised non-agricultural workers as per EC-98.

2.1.8 **Allocation of total samples to States and UTs:** The total (all-India) rural/ urban sample size had been allocated to different States and UTs in proportion to number of unorganised non-

agriculture workers as per EC-98 subject to the availability of investigators ensuring more or less uniform work-load.

2.1.9 Allocation to strata: Within each sector of a State/ UT, the respective sample size were allocated to the different strata in proportion to the stratum population as per census 2001.

2.1.10 Allocation to sub-strata:

2.1.10.1 Rural sector: 462 FSUs of sub-stratum 1 were allocated to the districts where these FSUs were located. For each sub-stratum 2, maximum allocation was 4. A set of 856 FSUs in the central sample and 796 samples in the state sample were selected at all-India level for sub-stratum 2. Minimum allocation for sub-stratum 3 and above was 2.

2.1.10.2 Urban sector: For 27 million plus cities in the urban sector, stratum allocations were distributed over the sub-strata in proportion to the number of non-agricultural workers in the unorganised sector as per EC '98. For other towns, stratum allocation was divided among the sub-strata in proportion to number of FSUs in the sub-strata with double weightage to sub-stratum 1. Minimum sub-stratum allocation was 2.

2.1.11 Selection of FSUs: Samples were drawn in the form of two sub-samples in each stratum \times sub-stratum. However, all the FSUs of sub-stratum 1 in rural sector were in sub-sample 1. Similarly, all list frame units in urban sector were considered in sub-sample 1 only.

All the FSUs of sub-stratum 1 in rural sector were common to both central and State samples.

2.1.11.1 Rural sector:

- (a) sub-stratum 1: All 462 FSUs were surveyed.
- (b) sub-stratum 2: FSUs were selected with PPSWR where size was number of non-ASI registered SSI DME units in the village.
- (c) sub-stratum 3, 4, 5,: FSUs were selected by PPSWR with size as population as per census 2001.

2.1.11.2 Urban sector:

(a) **For 27 million plus cities:** FSUs were selected by PPSWR with the *number of manufacturing workers* in the *unorganised sector as per EC '98* as size. The number of manufacturing workers was taken as 1 for those blocks where there were no unorganised manufacturing enterprises. However, some manufacturing enterprises had been found to have large number of workers as per EC- 98 frame even though they were in the unorganised sector. Some adjustment to the size of workers for such enterprises were, therefore, made before calculating the size of FSUs. For this purpose, any unorganised manufacturing enterprise having more than 200 workers was deemed to have a size equal to 200. Enterprise sizes were thereafter added up to get the FSU size and sub-stratum/ stratum size.

(b) **For other cities/ towns:** FSUs were selected by SRSWOR.

2.1.12 Formation of segment 9: Segment 9 was formed in the selected sample FSUs of rural sub-strata 1 & 2 of each stratum. It comprised only the big non-ASI registered SSI manufacturing unit(s) in the village as per DCSSI census on the basis of which the villages had been identified. The names of such units in the selected sample FSUs were supplied to field offices. If any such unit was found to be eligible for ASI, it was not be covered under segment 9. If there was a change

in the status of the enterprise from DME to NDME or OAME, it was still considered eligible enterprise belonging to segment 9. Only top 10 eligible enterprises in terms of number of workers constituted segment 9.

2.1.13 Selection of hamlet-groups/ sub-blocks/ households/ enterprises - important steps

2.1.13.1 Criterion for hamlet-group/ sub-block formation: Large villages/blocks were divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector. For this, approximate present population (P) and approximate total number of non-agricultural enterprises (E) for the whole FSU were ascertained first from knowledgeable persons. Depending upon the values of 'P' and 'E', it was divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

population (P)	no. of hgs/ sbs to be formed	no. of non-agricultural enterprises (E)	no. of hgs/ sbs formed
less than 1200	1	less than 120	1
1200 - 1799	3	120 - 179	3
1800 - 2399	4	180 - 239	4
2400 - 2999	5	240 - 299	5
and so on	...	and so on	...

However, while considering enterprise criteria, segment 9 enterprises, if any, were excluded i.e. the value of 'E' was adjusted in respect of the number of enterprises in segment 9. For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur, Doda districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows.

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

For enterprise criterion, procedure was not changed for the above areas.

The higher of the two values as per population and enterprise criteria was accepted as the number of hgs/ sbs to be actually formed. Hamlet-groups/ sub-blocks were formed by more or less equalizing population. Out of all hg's/ sb's formed in the FSU, two hg's/ sb's were selected for listing in the following manner - one with the maximum number of DMEs (or with maximum number of NDME if there was no DME or with maximum number of OAMEs if there was no DME/ NDME in the FSU or with maximum percentage share of population if there was no manufacturing enterprise in the entire FSU) was always selected and termed as **Segment 1**; one more hg/ sb was selected *randomly* and termed as **Segment 2**.

2.1.14 Listing of households/ enterprises and formation of their frame: Having determined the area(s) to be considered for listing, the next step was to list all the households and non-agricultural enterprises (NAEs). Although all non-agricultural enterprises were to be listed, only the

unorganised manufacturing enterprises under Industry Division 15 to 37 and NIC code 01405 (cotton ginning, cleaning and baling) as per NIC-2004 were covered. Thus, manufacturing enterprise registered under Sec. 2m(i) & 2m(ii) of the Factories Act, 1948 or Bidi and Cigar workers (conditions of employment) Act 1966 under the coverage of ASI or Govt. manufacturing enterprise/ PSU were not considered for survey. Further, only those manufacturing enterprises which operated for at least 30 days (15 days for seasonal enterprises) during the reference year (i.e. last 365 days preceding the date of survey) qualified for survey. Such enterprises will hereafter be referred to as '**eligible enterprises**'. Listing of households as well as eligible enterprises for the purpose of sample selection were independent for segments 1 & 2.

2.1.15 Formation of Second Stage Strata and allocation of enterprises for schedule 2.2:

All the eligible enterprises listed in the selected village/ block/ segment were stratified into two broad second stage strata by enterprise type OAME and NDME/ DME. Each of these two broad second-stage strata was divided into 3 second-stage strata by *Broad Manufacturing Group (BMG)* i.e. *BMG 1, BMG 2 & BMG 3*. Thus there were a maximum of 6 second-stage strata [SSS 1: (OAME x BMG 1), SSS 2: (OAME x BMG 2), SSS 3: (OAME x BMG 3), SSS 4: (NDME/ DME x BMG 1), SSS 5: (NDME/ DME x BMG 2) and SSS 6: (NDME/ DME x BMG 3)] in each segment.

The three BMGs were to be formed after classifying the unorganized manufacturing enterprises as per NIC-2004 as follows:

BMG	NIC-2004 codes
1	15 to 20
2	23, 27, 30 to 35, 01405
3	rest of NIC codes under Section 'D'

The composition of SSS and number of enterprises allocated for schedule 2.2 in each FSU was as follows (excluding DMEs in segment 9).

enterprise type	BMG	SSS no.	number of enterprises to be surveyed for schedule 2.2	
			without hg/ sb formation	with hg/ sb formation (for each segment)
OAME	1	1	2	1
	2	2	2	1
	3	3	2	1
NDME/ DME	1	4	2	1
	2	5	2	1
	3	6	2	1

From each SSS the sample enterprises for schedule 2.2 were selected by SRSWOR.

3. Estimation Procedure

3.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward) / block]

d = subscript for a segment (d = 1, 2, 9)

j = subscript for j-th second stage stratum in an FSU/ segment (j = 1, 2, 3, 4, 5 or 6)

k = subscript for k-th sample household/enterprise under a particular second stage stratum within an FSU/ segment

D = total number of hamlet-groups/sub-blocks formed in the sample village (panchayat ward) / block

$D^* = 1$ if $D = 1$

= (D – 1) for FSUs with $D > 1$

N = total number of FSUs in any urban sub-stratum belonging to the towns other than million plus cities

Z = total size of a rural sub-stratum or urban sub-stratum of million plus cities (= sum of sizes for all the FSUs of a sub-stratum)

z = size of sample village/block used for selection.

n = number of sample village / block surveyed including zero cases but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of a village/block/ segment of sample FSU

h = number of households surveyed in a second-stage stratum of a village/block/ segment of sample FSU

E = total number of enterprises listed in a second-stage stratum of a village/block/ segment of sample FSU

e = number of enterprises surveyed in a second-stage stratum of a village/block/ segment of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th segment (d = 1, 2, 9) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum;

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2A Formulae for estimation of aggregates for a particular sub-sample and stratum in case of Area Frame:

3.2A.1 Rural:

(a) Estimation formula for a sub-stratum 1 of a stratum:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \sum_{i=1}^{n_j} \left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

(b) Estimation formula for sub-stratum 2 of a stratum:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

Note: For segment 9, an adjustment may be necessary if $E \neq e$ for a second-stage stratum due to casualty at the detailed enquiry stage. In that case, contribution of segment 9 (i.e. $\sum_{k=1}^{e_{i9j}} y_{i9jk}$) may be

replaced by $\frac{L_{i9j}}{e_{i9j}} \sum_{k=1}^{e_{i9j}} y_{i9jk}$, where $L_{i9j} =$ (number of list frame enterprises of segment 9 with survey code 1) + (number of list frame enterprises of segment 9 with survey code 3 and reason for casualty codes 3 & 9).

$L_{i9j} = e_{i9j}$ if there is no casualty or there is casualty but with reason for casualty code as 1 or 2.

(c) Estimation formula for a sub-stratum other than sub-strata 1 & 2 of a stratum:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2A.2 Urban:

(a) Estimation formula for a sub-stratum of million plus cities:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

(b) Estimation formula for a sub-stratum of other strata:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2A.3 Estimate for a stratum:

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

3.2A.4 Overall Estimate for Aggregates for Area Frame:

Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.2A.5 Overall Area Frame Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the area frame estimates (\hat{Y}_s) of stratum over all strata belonging to the State/ UT/ all-India.

3.2B Estimates from List Frame enterprises in urban sector:

$$Y = \frac{L}{L'} \sum_{l=1}^{L'} y_l,$$

where

L = (number of list frame enterprises with survey code 1) + (number of list frame enterprises with survey code 3 and reason for casualty codes 3 & 9 in item 20, block 1, schedule 2.2)

L' = (number of list frame enterprises with survey code 1 in item 19, block 1, schedule 2.2)

Estimate may be generated for any domain e.g. district, State, All-India as well as for any NIC category, Division, Group etc., by restricting L, L' to that particular domain.

If there is no casualty or there is casualty but with reason for casualty code as 1 or 2 in item 20, block 1, schedule 2.2, then L = L'.

3.3 Overall Estimate of Aggregates at State/UT/all-India level in the urban sector:

The overall estimate \hat{Y} at the State/ UT/ all-India level for urban sector for the schedule 2.2 is obtained by summing the area frame estimates and list frame estimates of aggregates for the State/ UT/ all-India.

3.4 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimate of the aggregates Y and X (sum of area frame and list frame estimates) for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

3.5 Estimates of Error: There is no sampling for the list frame enterprises since it was the census of all units. The variance will comprise only that due to area frame units. The estimated variances of the estimates will be as follows:

3.5.1 For aggregate \hat{Y} :

$$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$$

where $V\hat{a}r(\hat{Y}_s)$ are as given below.

3.5.1.1 For strata with PPSWR selection at first stage:

$$V\hat{a}r_{ppswr}(\hat{Y}_s) = \left[\sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left(\frac{Z_{sti} \hat{Y}_{sti}}{z_{sti}} - \hat{Y}_{st} \right)^2 \right],$$

where $\hat{Y}_{sti} = \sum_j Y_{stij}$ and

$$\hat{Y}_{stij} = \left[\sum_{k=1}^{e_{sti9j}} y_{sti9jk} + \frac{E_{sti1j}}{e_{sti1j}} \sum_{k=1}^{e_{sti1j}} y_{sti1jk} + D_{sti}^* \times \frac{E_{sti2j}}{e_{sti2j}} \sum_{k=1}^{e_{sti2j}} y_{sti2jk} \right]$$

3.5.1.2 For strata with SRSWOR selection at first stage:

$$Var_{srswor}(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2,$$

where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.5.2 For ratio \hat{R} :

$$M\hat{S}E(\hat{R}) = \frac{1}{(\hat{X})^2} \left[\sum_s M\hat{S}E_s(\hat{R}) + \sum_{s'} M\hat{S}E_{s'}(\hat{R}) \right]$$

where s, s' indicate respectively the strata with PPSWR and SRSWOR selection at first stage.

3.5.2.1 For strata with PPSWR selection at first stage:

$$M\hat{S}E_s(\hat{R}) = \sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left[\frac{Z_{sti}}{z_{sti}} (\hat{Y}_{sti} - \hat{R}\hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R}\hat{X}_{st}) \right]^2$$

where

$$\hat{Y}_{sti} = \sum_j \hat{Y}_{stij}, \quad \hat{X}_{sti} = \sum_j \hat{X}_{stij},$$

$$\hat{Y}_{stij} = \left[\sum_{k=1}^{e_{sti9j}} y_{sti9jk} + \frac{E_{sti1j}}{e_{sti1j}} \sum_{k=1}^{e_{sti1j}} y_{sti1jk} + D_{sti}^* \times \frac{E_{sti2j}}{e_{sti2j}} \sum_{k=1}^{e_{sti2j}} y_{sti2jk} \right]$$

and

$$\hat{X}_{stij} = \left[\sum_{k=1}^{e_{sti9j}} x_{sti9jk} + \frac{E_{sti1j}}{e_{sti1j}} \sum_{k=1}^{e_{sti1j}} x_{sti1jk} + D_{sti}^* \times \frac{E_{sti2j}}{e_{sti2j}} \sum_{k=1}^{e_{sti2j}} x_{sti2jk} \right]$$

3.5.2.2 For strata with SRSWOR selection at first stage:

$$M\hat{S}E_{s'}(\hat{R}) = \sum_t \frac{1}{4} \left[(\hat{Y}_{s't1} - \hat{Y}_{s't2})^2 + \hat{R}^2 (\hat{X}_{s't1} - \hat{X}_{s't2})^2 - 2\hat{R} (\hat{Y}_{s't1} - \hat{Y}_{s't2}) (\hat{X}_{s't1} - \hat{X}_{s't2}) \right]$$

where $\hat{Y}_{s't1}$ and $\hat{Y}_{s't2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.6 Estimates of RSE:

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

3.7 Multipliers for Area frame enterprises:

The formulae for multipliers for a sub-sample and schedule type are given below:

sch type	sector	sub-stratum	formula for multipliers		
			segment 9	segment 1	segment 2
2.2	rural	1	$\frac{L_{stmi9j}}{e_{stmi9j}}$	$\frac{E_{stmi1j}}{e_{stmi1j}}$	$D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
		2, 3	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times \frac{L_{stmi9j}}{e_{stmi9j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
	urban	1, 2 (of EC-98 frame)		$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
		1, 2 (of UFS frame)		$\frac{N_{st}}{n_{stmj}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$

Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.

(ii) Multipliers have to be computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

(iii) For estimating number of villages possessing a characteristics, $D_{stmi}^* = 1$ in the relevant multipliers and there will be only one multiplier for the village.

(iv) L_{i9j} = (number of list frame enterprises of segment 9 with survey code 1) + (number of list frame enterprises of segment 9 with survey code 3 and reason for casualty codes 3 & 9) in i-th FSU and j-th second-stage stratum of m-th sub-sample of t-th sub-stratum belonging to s-th stratum.'

4. Treatment for zero cases, casualty cases etc.:

4.1 While counting the number of FSUs surveyed (n_{stm}) in a sub-stratum, all the FSUs with survey codes 1 to 6 in schedule 0.0 will be considered. In addition, if no SSU is available in the frame for a particular schedule then also that FSU will be treated as surveyed in respect of that schedule. However, if the SSUs of a particular schedule type are available in the frame of the FSU but none of these could be surveyed then that FSU has to be treated as casualty and it will not be treated as surveyed in respect of that schedule.

NSS Report No. 524: Operational Characteristics of Unorganised Manufacturing Enterprises in India, 2005-06.

4.2 *Casualty cases*: FSUs with survey code 7 as per schedule 0.0 are treated as casualties. In addition to this, an FSU, although surveyed, may have to be treated as casualty for a particular schedule type and a particular *second stage stratum* as given in the following para:

4.2.1 FSUs with survey codes 1 and 4 as per schedule 0.0 having number of households in the frame of j-th second stage stratum greater than 0 but number of households surveyed according to data file, considering both segments together, as nil (i.e. $H_{i1j} + H_{i2j} > 0$ but $h_{i1j} + h_{i2j} = 0$) will be taken as casualties for j-th second stage stratum.

4.2.2 Similarly, FSUs with survey codes 1 and 4 as per schedule 0.0 having number of enterprises in the frame of j-th second stage stratum greater than 0 but number of enterprises surveyed according to data file, considering all three segments together, as nil (i.e. $E_{i9j} + E_{i1j} + E_{i2j} > 0$ but $e_{i9j} + e_{i1j} + e_{i2j} = 0$) will be taken as casualties for j-th second stage stratum

All the FSUs with survey codes 1 to 6 as per schedule 0.0 minus the number of casualties as identified above will be taken as the number of surveyed FSUs (n_{stmj}) for that sub-stratum \times second stage stratum.

4.2.3 When casualty for j-th second stage stratum occurs for a particular segment but not for the other segment, the FSU will not be treated as casualty but some adjustments in the value of H and E for the other segment will be done as follows:

- (i) Suppose for segment 1, $H_{i1j} > 0$ but $h_{i1j} = 0$ while for segment 2, $H_{i2j} > 0$ and $h_{i2j} > 0$. In that case $D_i^* \times H_{i2j}$ will be replaced by $(H_{i1j} + D_i^* \times H_{i2j})$ in the formula for multiplier of segment 2.
- (ii) Suppose for segment 1, $H_{i1j} > 0$ and $h_{i1j} > 0$ while for segment 2, $H_{i2j} > 0$ but $h_{i2j} = 0$. In that case H_{i1j} will be replaced by $(H_{i1j} + D_i^* \times H_{i2j})$ in the formula for multiplier of segment 1.

Adjustments may be made in the multipliers for schedule 2.2 if similar situation arises for enterprises. However, segment 9 need not be clubbed with segment 1 or segment 2 if segment 9 enterprises are surveyed but no enterprises could be surveyed from segments 1 / 2.

It may be noted that n_{stmj} would be same for segments 1 & 2 of an FSU.

5. Treatment in cases of void second-stage strata/sub-strata /strata/NSS region at FSU or household level

5.1 A sub-stratum may be void because of the casualty of all the FSUs belonging to the sub-stratum. This may occur in one sub-sample or in both the sub-samples. If it relates to only one sub-sample, then estimate for the void sub-stratum may be replaced with the estimate as obtained from the other sub-sample for the same sub-stratum.

5.2 When a sub-stratum is void in both the sub-samples, the following procedure is recommended:

Case(I): Sub-stratum void cases at FSU levels (i.e. all FSUs having survey code 7):

- i) If one of the rural sub-strata 3, 4, 5, ..., etc. is void then it may be merged with a sub-stratum having the next higher population size class of villages within the same district. Sub-stratum 3 may be merged with sub-stratum 4, sub-stratum 4 with sub-stratum 5 and so on. If last sub-stratum is void, it will be merged with the previous sub-stratum.
- ii) If sub-stratum 1 and/or sub-stratum 2 are void, SDRD may be consulted for necessary guidelines

(iii) If an urban sub-stratum is void then it may be merged with the sub-stratum with the other sub-stratum of the same stratum.

iv) If all the sub-strata in a district are void, it may be excluded from the coverage of the survey. The state level estimates will be based on the estimates of districts for which estimates are available and remarks to that effect may be added in appropriate places.

Case (II): Stratum void case at second stage stratum level (i.e. all the FSUs are casualties for a particular second stage stratum):

An FSU may be a casualty for a particular *second stage stratum* although survey code is not 7. If all the FSUs of a sub-stratum become casualties in this manner for a particular *second stage stratum*, the sub-stratum will become void. In such cases, sub-strata will be merged with other sub-strata for all the second stage strata as in *Case (I) above*.

However, if whole district/stratum becomes void in this manner for a particular second stage stratum, adjustment for this type of stratum void case may be done according to the following guidelines.

The adjustment will be made involving other strata (within NSS region) of the State/U.T. Suppose A, B, C and D are the four strata in the State/UT/Region and stratum C is void for j-th *second stage stratum*. If \hat{Y}_{aj} , \hat{Y}_{bj} and \hat{Y}_{dj} are the aggregate estimates for the strata A, B and D respectively, then the estimate \hat{Y}_{cj} for stratum C may be obtained as

$\left(\frac{\hat{Y}_{aj} + \hat{Y}_{bj} + \hat{Y}_{dj}}{Z_a + Z_b + Z_d} \times Z_c \right)$ where Z_a , Z_b , Z_c and Z_d are the sizes of strata A, B, C and D respectively.

5.3 It may be noted that sub-round wise allocations of sample FSUs in 62nd round were not equal for all the sub-rounds. Sub-round wise estimates may not be comparable and hence they may not be attempted.

Appendix C

Schedule 2.2

RURAL		*
URBAN		

CENTRAL		*
STATE		

**GOVERNMENT OF INDIA
NATIONAL SAMPLE SURVEY ORGANISATION
SOCIO-ECONOMIC SURVEY
SIXTY-SECOND ROUND: JULY 2005 – JUNE 2006**

SCHEDULE 2.2: MANUFACTURING ENTERPRISES

[0] descriptive identification of sample enterprise	
1. state / u.t.:	6. ward /inv. unit / UFS block:
2. district:	7. name of owner:
3. tehsil / town*:	8. name of informant:
4. village name:	9. name and address of the enterprise:
5. serial no. of hamlet:	

[1] identification of sample enterprise									
item no.	item	code			item no.	item	code		
1.	serial number of sample village/block (area frame) / enterprise (list frame)					12.	stratum		
						13.	sub-stratum		
						14.	segment number (1 / 2 / 9)		
2.	frame used (list-1, area-2)				15.	second stage stratum (code)			
3.	round number	6	2		16.	sample enterprise number (segment 1/2) / enterprise number (segment 9)			
4.	schedule number	0	2	2					
5.	sample (central-1, state-2)				17.	informant code			
6.	sector (rural - 1, urban - 2)				18.	response code			
7.	state – region				19.	survey code			
8.	district				20.	reason for casualty (list frame / segment 9 of area frame)/ substitution of original enterprise (segment 1/2 of area frame)			
9.	sub – round								
10.	sub – sample (put '1' for list frame)								
11.	FOD sub-region								

CODES FOR BLOCK 1

item 17 : **informant code** : owner/partner – 1, manager – 2, others working in the enterprise – 9

item 18 : **response code** (to be filled up after filling up the entire schedule):

informant : co-operative and capable – 1, co-operative but not capable – 2, busy – 3, reluctant – 4, others – 9

item 19 : **survey code**: original enterprise surveyed – 1, substitute surveyed – 2, casualty – 3

item 20 : **reason for**

casualty (list frame and segment 9 of area frame): enterprise: Government/ PSU/ registered under Section 2m(i) or 2m(ii) of Factories Act, 1948/ Bidi and Cigar Workers (Condition of Employment) Act, 1966 and under the coverage of ASI – 1, non-operative/closed during the reference year/ non-traceable – 2, in operation during the reference year but data could not be collected – 3, others(specify) – 9

substitution of original enterprise (segment 1/2 of area frame): informant : busy – 1, not available – 2, non-cooperative – 3, others – 9

* Tick mark (✓) may be put in appropriate place.

CODES FOR BLOCK 2

item 207: type of ownership			
proprietary (male).....	1	partnership between members not all from the same household...	4
proprietary (female).....	2	co-operative society.....	5
